

news

Dear all,

There is no better way to start our first newsletter than to congratulate you on the effort and dedication invested in the VEMoS project!

The next phases of the project are the most complicated and delicate ones which is why we need to work together to be able to overcome the different challenges that might arise.

Nevertheless, we are sure that as a team we will be able to complete the objectives in an outstanding way!

1 STUDY PROGRESS

- The application's specific ray tracing software has been tested and perfected to ensure optimum results.
- The VEMoS devices provided by CSO have arrived to our clinics! Our ophthalmologists have been trained and are ready to begin with the clinical trials.
- Regarding the paperwork, an amendment was presented to the GA as well as the period report 4.
- Abstracts have been submitted to the following congresses: 9th International Work-Conference on Bioinformatics and Biomedical Engineering (IWBBIO 2022) and the 40th Congress of the European Society of Cataract and Refractive Surgeons (ESCRS 2022).

2 NEWS

- 05/11/2021 - Meeting of the VEMoS team at the 39th Congress of the ESCRS in Amsterdam, Netherlands.
- 24/02/2022 - VEMoS Ophthalmic Devices have arrived! We are ready to start with the clinical trials!

VEMoS is a Project funded by the European Commission

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 878748
