

news

DEAR All,

CLINICAL TRIALS HAVE OFFICIALLY
BEGUN !!

1 STUDY PROGRESS

- Training on the use of the ophthalmological devices and the VEMoS app have taken place.
- Knowledge on how to add and register new participants on the software developed has been acquired in order to be able and extract biometric data necessary for the modelling of the virtual eye.
- Deliverables D6.3, D7.5, D7.1, D2.2 have been submitted.

2 WHAT NEXT?

- Abstract submitted to the congress: IWBBIO 2022 (9th International Work-Conference on Bioinformatics and Biomedical Engineering) has been accepted as an oral presentation. See you June 27th-30th at Gran Canaria!
- ESCRS congress at Milan 16th-20th September.
- Continue with the recruitment of participants with untreated eyes and complete the deliverables to come
- Stay tuned for upcoming news and statistics on advances in the clinical trial!

VEMoS is a Project funded by the European Commission

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 878748
